

Please do not approve this petition. Vote NO on June 2. I believe that we should continue with the present rules that limit the ownership of broadcast "stations" in the AM, FM and TV services.

These frequencies form a "limited" resource (unlike print media) and it is not in the "public" or "national" interest to provide an opportunity for a few giant corporations to control a large percentage of them through "broadcast" services. This is a very poor idea which will not serve the public in the ability to present divergent views on public issues.
